Optimum versatility

The L oil-free and oil-lubricated compressors are available in a number of product variants to match the exact needs of a wide range of end users. They are available as standard "core" units, with the possibility to add a number of standard options, giving the flexibility to match the individual application requirements.

Block

The heart of the L is a compact and light-weight automotive type aluminium compressor block designed

Powerpack

In a Powerpack, the L compressor block is directly driven to an electrical IP55/insulation class F motor. L
